ESPRIT home 13 – *Reveal your Personality*

With ESPRIT through the year 2018: We accompany a romantic botanist, a nostalgic folklorist, a luxurious eccentric and a true minimalist on her journey through the four seasons. Here we discover the fine details of the enchanting new wall outfits: highquality materials, fresh colours and sophisticated textures – a collection with its own character and always with a touch of esprit.

The collection themes

Romantic Botanics – Spring is in the air

The home of the romantic botanist is like an old English cottage. Romantic Botanics brings spring to life with fresh, soft, sunrise-like colours and hand-drawn floral patterns that give the interior a light, natural feel. Impeccable white and accents in Breeze and Salmon characterize the colour palette..

Nostalgic Folklore – Summer is calling

The nostalgic folklorist loves nature. On a warm day, you can find her on a meadow or at home, surrounded by flowing fabrics with floral ornaments. Combined with geometric patterns and stripes, it creates a very personal mix. Finally, it is summer and everything is allowed. With the temperatures, the intensity of the color palette also increases: deep blue navy and bright mandarin complement the spring colors. Tropical turquoise and strong pink add radiant accents.

Eccentric Luxury – Autumn brings opulence

As soon as the first leaves fall, the luxurious eccentric sits in the middle of her soft velvet sofas, fine wood furniture and brocade cushions. Opulent baroque acanthus decors in rich exquisite bordeaux, petrol and stone tones form the framework for her stylish, glamorous home. The expressive gold and silver shimmer of the noble wall clothes reflects the reflection of the fireplace fire and creates a moody, festive atmosphere.

Minimalistic Authenticity – Winter sparkles brightly

A visit to a true minimalist impresses with the simple authenticity of her interior: clear forms, subtle colours and a few, carefully selected decorative pieces characterize her relaxed living style. Wall outfits with finely drawn textures, reminiscent of snowy winter forests, provide the perfect underpainting. Filigree graphic designs in snow, stone, salmon, ice blue and coal glitter like ice crystals in the sun.

Wallpaper Eco – Nature with funky touch

Optimistic, environmentally friendly and with a certain extra - this is how the current ECO wall outfits, which should not be missing at ESPRIT, present themselves. With shimmering graphic metallic patterns in delicate Breeze, Salmon and Lime they fit beautifully into friendly interiors with lots of light wood and give it a funky touch.

Collection: ESPRIT home 13

Brand: livingwalls

Material: non-woven material, paper
