

A.S. Création Press Release

Gummersbach, February 2019

walls by patel 2 – Stage designs for life

“Give your walls a voice”, insist Kathrin and Mark Patel. Together with A.S. Création, the designer couple have designed a new multi-faceted collection rich in motifs. More than 270 digital prints make individual statements – sometimes loudly and with stunning imagery, sometimes quietly and subtly. Whether in private rooms, shops, offices or restaurants: the wall images by Patel tell stories. They set a stage for individual lifestyles, create atmospheres and new possibilities, to produce an ambience which is as unique as the personalities within them.

The Themes of the Collection

boys are back in town

They only want to play: with image, shape and colour. Whether cool or crazy, hard or soft: the motifs shape the feeling of the room. They lift the mood and radiate zest for life, dynamism and a lust for adventure.

we will rock you

Fascinating three-dimensionality sets the stage for a modern, unusual interior style. The impression of rock can serve as a setting for a puristic ambience – or as an unexpected, exciting contrast to a warm interior.

into the great wide open

Classic natural scenes – re-interpreted. The grandiose panoramas make vastness palpable and convert living spaces into refuges for dreams which allow you to forget about all the hustle and bustle and stress.

girls just want to have fun

More play, less seriousness. More fantasy, less everyday. A bit rebellious, a bit cheeky. For a vibrant, young ambience which comes across as fun-loving and carefree and sets colourful exuberance against any routine.

the secret garden

A special kind of botanical excursion: with uncontrolled growth or cultivated beauty, these wall images create oases in the middle of urbanity. The motif richness of the floral designs is opulent, and their effect intoxicatingly emotional.

love me tender

The highly detailed vintage charm of this design, with its textile impression, ensures a warm, extroverted ambience. The motifs and the structures incorporated in the digital prints ensure a very special visual appeal.

you're my wonderwall

Lines, colours and shapes in a three-dimensional game with wood, cardboard and felt: the strength of the geometry and the different material looks have a pronounced unconventional effect and set the scene for the motifs in an exciting way.
