walls by patel texts

press release

give your walls a voice ...

Individual expression - sometimes loud and visually powerful, sometimes quiet and subtle - is always a statement that needs to be heard. Attitude can have many facets, and this diversity is reflected in the new collection by Kathrin and Mark Patel. **walls by patel** show who you are. They express what a sentence cannot say. They have their own rhythm, tailored to your life.

walls by patel open up completely new possibilities for creating an ambience that is as unique as the people who spend time in it. As personal as a favorite song, setting the tone for the mood in the room. dominant, dreamy, playful or elegant: **walls by patel** create a stage for what happens in the room. They generate atmosphere - in both private and public areas. The motifs in this collection constantly create new possibilities for designing rooms, dividing them up and giving existing architecture new visual structures.

With **walls by patel**, Kathrin and Mark Patel aim to create a convincing overall design concept. Not just harmonious and atmospheric individual designs, but a common denominator is created that places the entire collection under one motto. „love me tender“, „wonderwall“, „into the great wide open“: just as the soundtrack of our lives is a mirror of our personality, here the wall becomes a field of expression for lifestyle and atmosphere. **walls by patel** tell stories, serve a subjective attitude to life and make it public.

walls by patel shows the very personal diversity of style of two people whose understanding of design always includes breaking with conventions and conventional viewing habits. Find out more about the designer team's approach at www.kathrinpatel.de.

theme texts

boys are back in town And they just want to play – with images, shapes and colours. Whether cool or crazy, tough or sensitive, the field is free for a visual kick-off. These prints dominate the ambience with their charming tongue-in-cheek appeal, they lift the mood and convey a dynamic, adventurous joy of life.

we will rock you Fascinating reliefs: These gripping three-dimensional impressions pave the way for modern and unusual interiors. The cool and hard appeal can be used as a setting for a reserved ambience or offers an extraordinary contrast to warm furnishings. Ideal for large-scale objects.

into the great wide open Feel vast expanses, breathe in the quiet, embrace nature: These wall images provide a resort from everyday life and relieve stress by charging the atmosphere with positive energy. The picturesque brittleness of the backgrounds presents an artistic re-interpretation of classic theme worlds.

girls just want to have fun More feelings, less words. More playfulness, less seriousness. More imagination, less ordinariness. A little cheeky, a little daring. For a vivid young ambience which embraces life and opposes daily routine with colorful, carefree statements.

the secret garden Botanical excursion of a special kind: Whether wild proliferation or cultivated beauty, these designs convey an exceptional well-being and create secret oases of comfort amidst urbanity. The visual language of the images is voluptuous and infectiously emotional.

love me tender The intricate vintage charm of these designs and their textile optics convey a warm, extroverted energy. These walls will stand out in suspenseful contrast to modern furniture. Not merely their strong imagery is impressive but also the incorporated background structure.

you're my wonderwall Lines, shapes and colours in a three-dimensional game with wood, paper and felt: The strictness of geometry is puristic, unconventional and modern. The sobriety of the alignment is countered by warm colours and seductive material optics which beg to be touched.
