

## **A.S. Création Press Release**

Gummersbach, May 2021

### **Cuba – Holidays for at home**

After the successful "Borneo" collection, the journey continues to Cuba.

The "Cuba" collection by A.S. Création is inspired by the flora and fauna of the Caribbean state and evokes holiday memories.

Branches and blossoms of the hibiscus bush complemented by the finery of the colourful houses of the capital Havana. Tropical palms and graphic weaves complement each other perfectly with the colour coordination and the textile surface of the wallpaper.

Modern interpretations of rainforests combined with vintage tiles optimally convey the natural environment of the island state.
