Gummersbach, October 2021

GEO EFFECT – Geometric designs

Geo Effect, the new collection from A.S. Création presents wallpapers with geometric designs inspired by the fashion of France.

The designs are visually supported by special effects of metallic tones such as gold, silver and bronze.

Large triangles, trapezoidal geometry or hand-drawn circular shapes inspire design lovers with contemporary colourings.

Cubes with a watercolour look and a zigzag design create beautiful surfaces on the walls of your own home.

The patterned wallpapers in the collection are complemented by two different plain textures, some of which have metallic effects that make them particularly appealing.
