HIGH RISE by MICHALSKY Living

The new “High Rise” wallpaper collection is an extension of the successful MERTROPOLIS BY MICHALSKY LIVING series. As with his previous collections, Michael Michalsky was inspired by the way of life in the world's metropolises. With High Rise, the name says it all because nothing characterises a metropolis more than its high-rises. The four patterns of this series are dedicated to precisely this theme. The huge buildings are called skyscrapers because they give the impression that they reach as far as the sky. The designer reaches for the stars – and not just in the figurative sense. Whether a large-scale star stamp or a delicate star pattern, High Rise puts the stars in the centre and allows you to enjoy nightly city skies within your own four walls.
