

A.S. Création Press Release

Gummersbach, June 2021

Trendwall 2 - Inspired by the trends on Instagram and others

The Trendwall 2 collection by A.S. Création impresses with its versatility.

For example, the collection also includes two design groups that were developed together with blogger Laura Noltemeyer (Designdschungel): a large palm leaf with metallic effects combined with an indirect Artdeco motif and a multi-layered plain structure. The second design is filigree branches with matt-gloss contrasts in pastel shades, which can be combined with block stripes of the same colour.

Romantic pink and white floral walls are still in vogue and should not be missing from this trendy collection.

The industrial trend is also still in demand and is brought to the walls by high-gloss metallic surface patterns in copper, rose gold, gold, silver, anthracite, blue, green and dove.

Trendwall 2 Collection
